👤 PROFILE

Aspiring Software Engineer and Data Analyst with a degree in Computer Science from the University of the Witwatersrand. Experienced in developing Android and Web applications, ML agents, and web games. Passionate about leveraging AI to solve real-world problems, such as disease recognition and spending habit predictors.

🎓 EDUCATION

University of the Witwatersrand

Computer Science

Johannesburg

Wonderful Learning Experience that taught me skills which I can use to make a difference.

🧠 SKILLS

Web & App

Development: React Native, Android Studio, Vanilla.js, React.js, Next.js, Flask

Full Stack

Development: Frontend, Backend, API including REST, gRPC

Data Analysis: NumPy, seaborn, scikit-learn, pandas, matplotlib

Game

Development: Three.js, Blender

Programming: Java, C++, C, Python, JavaScript, TypeScript

👛 PROFESSIONAL EXPERIENCE

Software Developer / Data Analyst

Medical Consortium of Africa

01/2026 – Current | Pretoria, Gauteng

- I am developing ML agents and Data Analysis to gather data and predict disease outbreaks in certain areas in Africa
- Developed the Platform for Malaria and NCD prediction platform.

First Year Computer Science and Applied Mathematics Tutor

University of the Witwatersrand

02/2025 – 11/2025 | Johannesburg, Gauteng

- Tutored first years in Programming fundamentals, Data Structures, Basic Computer Organisation, and Discrete Mathematics and Scientific Computing.
- Responsibilities included Tutoring, Invigilating, and Marking.

📁 PROJECTS

Wits Parking System

An Android Mobile app for Wits Parking

There was a problem of finding suitable car parking in the Parking Lots of Wit University. In this project, we used Android Studio (Java) to solve that problem, enabling authentication, Google Maps for GPS tracking, and a ticketing System for Parking.

University Research and Collaboration

Hub of Research Collaborarion

Most individuals who are doing research struggle to find suitable collaborators for their research and projects that's where our project came in. This webapp acted as a platform for collaboration, exchanging files, and notes among collaborators.

Sport stat tracker

HoopMania

Many Sports betting and game companies charge for the needed historical data to make informed decisions, which is where we come in. You can find historical data for Teams, Players and Leagues in the sport of basketball.
